Q: Running two websites at the same time - ASP.NET I want to run two websites on the same server, but they will be accessed by different IP addresses. For example, website1.com should be accessed by IP 1.1.1.1 and website2.com should be accessed by IP 2.2.2.2. I think I can do this by using IIS. Is this the best approach? Thanks.

A: You could try the Web Deploy Package Framework. The good thing is it can package up individual web sites, so you could just create a package with both and upload it

Before Season 1 of “Orange is the New Black” was released, the buzz was that Netflix had created a new, original television show with “Breaking Bad” creator Vince Gilligan at the helm. Many were impressed by the polished debut season, which got some of the most sought-after actresses of the

---

moment, Taylor Schilling, as well as “True Blood’s” Uzo Aduba in the cast. The sets and writing were also thought to have some of the style of “Breaking Bad.” And while “Orange is the New Black” didn’t quite live up to its hype, the first season had some of the best scenes of the year, and was worth the wait. Based on Piper Kerman’s memoir “Orange Is the New Black: My Year in a Women’s Prison,” the series follows the events in Kerman’s life after she is arrested for selling drugs. As a kind-hearted, well-intentioned inmate, she gets caught up in the world of the women’s prison where inmates are mistreated and punished for minor crimes. In a crime-ridden world, life in prison is a series of unpleasant challenges. “I have nothing to say about the show because it’s only in the second episode that Piper actually appears,” K
