Logos Scholar Gold Libronix 3.0E crack thepiratebay all requests are disabled>Data is just a stupid rock of mine." — Goaflix Gagnier Data is a rock for me too. It's a stupid rock and a useless rock. Nonetheless, I'm fascinated to collect and contemplate massive amounts of data. Sometimes, that data is pretty sexy too. Data mining for fintech services can be that way. But don't ask me to explain it, just trust me that it is. I've been doing that for a while and I'm confident that it's gonna pay off. Data mining has been on our to-do list since we started Goaflix. There are a few reasons why. Data is more than a rock. It's a diamond. But it's also a waste of time. We've been exposed to that through marketing. Or so we're told. I don't buy it. I was really fascinated to become a data scientist, partly because this is what I expected to learn in university. When I got there, it was all about Excel. I studied management, not economics. I fell out of love with the magical, monetary tool that marketers thought would make everything simple. Data science tools are super useful when they are presented as human data analysis software. From our conversations with customers, we get it. But we've experienced an awful feeling when we try to use it ourselves. When we are supposed to do something about our data, it's always a non-answer about what we should do with it. It's always about Excel. It's never about how to work with data. This is one of the cases where we are coming from a different background, when we wish for the tool to do the work for us, while all we do is feeding it. But when data is a rock, it feels different. When it feels like the rock is worth to be discovered, it's sexy. Data makes everything super sexy, when it is a rock and not a diamond. It's the time to look at it and let it change your life. It can't and it can. If we take a look at our audience, we see that we are not the only one' e24f408de9
