Ls Magazine Littlepirates 3setsrar

ease-of-use, all in one, no ads, no registration, no backup ... -ls-magazine-littlepirates-3setsrar Q: php md5 truncated string I have a very simple php script to encrypt some values. I'm trying to generate a md5 of my string, but always a truncated string is the result. The script is as follows: \$data_key = '9ef2c1a6f3b8b69f1891cc15e9e8a8a6'; echo bin2hex(md5(\$data_key)); The result is as follows: 9c95b74c86b8c87e16ab92b8cfa9a98 How can I avoid this problem? A: If you use the hex encoding option for md5, it will get rid of the truncation. \$data_key = '9ef2c1a6f3b8b69f1891cc15e9e8a8a6'; echo bin2hex(md5(\$data_key, true)); Output: 9c95b74c86b8c87e16ab92b8cfa9a98 A: You need to set the second parameter of md5() to true. A: Your input for the md5 should be a string, e.g. \$string='9ef2c1a6f3b8b69f1891cc15e9e8a8a6'; echo bin2hex(md5(\$string)); or you could just pass your string as an argument to the function. Q: Realizar busca por célula vazia C# Sei que quando se faz um "if" ou "else" em C#, só existe um laço, não importa quantos itens do banco de dados foram cadastrados na frente. Por exemplo, se um usuário irá cadastrar o produto X do link ao nome Y, e depois quiser verificar se aquele produto foi cadastr 3da54e8ca3
