NFSMW Additional options. Extra Options is a mod scripting, which in many respects improves your gaming experience. It is designed by the EXOPTS command. In order to use Extra Options, it is necessary to establish a modification. You will find Extra Options files located in the root directory of the game, and you will not have any compatibility issues. Extra Options adds new options to the car selection menu that change how cars look like behaving in races where they go, how they change the color and how they change the number. For example, you can choose the color of the machine or its number - and all other parameters of the car will change in a certain way.
