The camera rotates around the fighter and moves up and down to display ever changing views of the model. XWing Description: Use your mouse to control the X-wing. The X-Wing is hovering over a landing platform in front of a star field. The camera rotates around the fighter and moves up and down to display ever changing views of the model. XWing is the download version of the X-Wing Animated Screensaver and is compatible with X-Wing, X-Wing vs TIE Fighter, X-Wing vs Rogue Squadron, X-Wing vs Rebels, X-Wing vs Imperial TIE Fighters, X-Wing vs Snowspeeders and X-Wing vs The Scum & Villain

## What's New In?

The X-Wing Fighter is a versatile starfighter used primarily by the Rebel Alliance during the Galactic Civil War. The X-Wing comes in various sizes, from a small fighter used by Rebel pilots to the larger "A-Wing" carrier used by the Empire. It is widely regarded as the Star Wars equivalent of the TIE interceptor. The X-Wing is a fictional spacecraft first introduced in the original 1977 film, Star Wars. It is the main starfighter of the Rebel Alliance during the Galactic Civil War. This screensaver will run in the tray and be available to switch on at the touch of a button in the tray. As the X-Wing flies around the screen, it will display a 3D model of the starfighter. At the beginning of the screensaver the fighter will be seen from overhead and will fly in one direction. The camera then rotates around the fighter and moves up and down to display ever changing views of the model. The fighter will show the cockpit, its rear and nose section as well as the wings. Features: - The X-Wing comes in various sizes, from a small fighter used by Rebel pilots to the larger "A-Wing" carrier used by the Empire. - This screensaver will run in the tray and be available to switch on at the touch of a button in the tray. - As the X-Wing flies around the screen, it will display a 3D model of the starfighter. - At the beginning of the screensaver the fighter will be seen from overhead and will fly in one direction. - The camera then rotates around the fighter and moves up and down to display ever changing views of the model. The fighter will show the cockpit, its rear and nose section as well as the wings. - The fighter will be at different stages of its flight cycle, displaying the cockpit at the top, the rear of the fighter in the middle and the nose at the bottom. - There are other starfighters available to fly through the landingspecial pack and there is a choice of engine settings. - A collection of themed audio files are included that can be played in the background. - The additional screensaver from the Star Wars Limited Edition pack. - The additional screensaver from the Revenge of the Sith pack. - The additional screensaver from the The Clone Wars pack. - The additional screensaver from the Dark Forces pack. - The additional screensaver from the Empire pack. You need to install at least 3Dfx Voodoo 2 graphics card to run the screensaver. Some cards which could run it include - For the developers: Are you familiar with screensavers? Or at least know about a few tricks that could improve the average rating of this screensaver. Some of the things that may help you increase the rating are as follows
