Game play is an adventure game, players need to develop all the tools in order to complete the game. There is no difference between single-player and multiplayer game play. No one to be the hero. There are many things you need to do to complete the game, at this stage, we suggest you to focus on one skill of cultivating, developing, fighting, or gathering. Don't try to do all at the same time. As a result, you will run into unnecessary difficulty and increase the risk of ending up in a dead end. This is why it's better to have a clear goal, focus on one thing, and make a plan. Plan in advance: Binding treasures, ancestors, and Taoist soldiers to strengthen you is very important, especially during the early game. You can only do this after reaching an appropriate level. At this stage, plan ahead on where you will focus your cultivation. If you plan, you will have a clear goal, the game will be more interesting. First cultivation: Fish energy growth, fish energy in the game is used to replenish your energy and prevent fatigue during battle. Fish energy can be obtained from fish. When fish energy is low, at this time it is recommended to eat more fish. When you are in an emergency situation, fish will be the first priority. In this game, instead of killing monsters, eating, the other way is to fish. Fish energy is used to replenish the spirit energy of your party members and prevent the effect of fatigue. By fighting and competing with others, you can share fish energy. The first cultivation of the game, before this you must maintain your strength and fatigue. Fish can be found in different places, including the River of Enchantment and the River of Memory. This is the way to make money in the game, with good recipes, you can buy the ingredients, and the more you buy the more powerful the item becomes, the more powerful the item. Q: How to join two tables on summing a column in SQL Server I have 2 tables and I want to join them together that I've found absolutely the hardest thing in SQL. I have these 2 tables: Table 1:

Product_name	Image1	Image2	Sum(Image1+Image2)
Can of Salmon	1	2	3
Fruitcup	3	4	7
Can of Beans	5	6	13

Table 2:

Product_name	Image1	Image2
Can of Salmon	4	8
Fruitcup	8	12
Can of Beans	2	6

How would I join this tables together so it ends like this:

Product_name	Image1	Image2	Sum(Image1+Image2)
Can of Salmon	1	2	3
Can of Beans	2	6	8
Fruitcup	3	4	7

I used this query and that didnt help me: `SELECT DISTINCT COALESCE(Table1.Product_name, '') AS Q1_Name, COALESCE(Table2.Image1, '') AS Q1_Image1, COALESCE(Table2.Image2, '') AS Q1_Image2, COALESCE(Table1.Image1+COALESCE(Table1.Image2, '')+Table2.Image2, '') AS Q1_TotImage FROM Table1 LEFT OUTER JOIN Table2 ON (Table1.Product_name=Table2.Product_name) Table1 is dependent on`
