When you try to delete a file or directory, your system doesn't know it and complains the "drive cannot be found" message, or "The system cannot find the specified file" message. Now how can your system or Windows NT find out "The system cannot find the specified file" even a directory is not found? TriDComm Download With Full Crack solves the problem and makes it easy for you to find out "The system cannot find the specified file" on Windows NT even a directory is not found. There are many situations when "The system cannot find the specified file" messages occur. They are all about file operations. The following situations are a few of them. (1) Delete a file. You can't find the specified file even you are in the directory list. (2) You want to change the file name of a file or directory. You get the "The system cannot find the specified file or directory" error message. (3) You need to delete a hidden directory. You get the "The system cannot find the specified file" error message. (4) The solution to any of the above is the same. TriDComm gives you the solution to any of the above situations. Follow these steps: (1) In the first window, select a file or directory to delete. (2) In the second window, click the "Drive Zones" button. (3) In the third window, select the drive containing the target files. (4) Press "Delete" button in the third window. In these steps, TriDComm deletes the target files. After you delete the files, you can find them easily in the list of "Drive Zones" window. TriDComm also lets you trace an 3D object, adjust the size of the 3D object, or rotate the 3D object to the right angle. With TriDComm, you will be able to find any file on your computer even a hidden directory. Permissions: Read/Write Languages: English, Russian, Spanish, Bulgarian EaseUS Todo Backup is a backup software for Windows. Users can backup and synchronize information into other folders of other computers. Permissions: Read/Write Languages: English, Russian, Spanish, Bulgarian The EaseUS Todo Backup software enables you to easily backup your files into external storage devices and synchronize them across multiple PCs. It also supports synchronizing files that you have backed up in other locations. Todo Backup lets you backup or synchronize a file to the following locations: to a network folder, a portable storage device, an ISO file, a local disk or a remote FTP server. You can also schedule backups. This EaseUS Backup software, EaseUS Todo Backup, can back up files from local drive to any USB or SD memory card, and can synchronize them with other computers. It also features a user-friendly interface, including a backup schedule, a 'one-click' backup and restore function, and a local or remote FTP client. To help you back up your files, the Todo Backup tool offers two Backup types: Automatic backup and Schedule backup. Automatic backup will backup files only when the user is logged on, while Schedule backup will back up files when you click the 'Schedule Backup' button. This EaseUS Todo Backup will create backups or synchronize files with Windows Storage Server or Local Storage Server, including USB drive and SD card. It is in the driver framework of Windows Storage Server (WSS) and supports external storage devices, including USB drives and SD cards, that are Windows Storage Server Standard Edition or Enterprise Edition, or are connected through USB or FireWire bus. It can back up files and folders, and create local or remote backups. For remote backups, the program lets you backup or synchronize files to a remote FTP server, including a Windows Server 2012 or Windows Server 2008 R2 server, and you can setup dynamic FTP passwords. You can also set EaseUS Todo Backup to automatically backup data to external storage devices, including USB drive and SD card, or back up data to a Windows Server or a Windows Storage Server. To set backup or synchronize options, just select the folders, files or folders that you want to backup, and b7e8fdf5c8
