Version 1.3.3 (at time of writing) has been released and contains only bugfixes and upgrades. Enjoy it! Version 1.3.3 contains: - Resolved graphics glitch - Fixed various bugs - Enhanced gameplay, interface, and content About The Game Drifter's Tales - Early Access Drifter's Tales is an adventure game based on the stories of The Drifter. The game is set in a very dark and gloomy world, you play as a swarthy drifter, who is looking for money and his kidnapped friends. The game features more than 50 hours of gameplay, over 100 new mobbed enemies, over 100 new bosses and many new locations. All characters are drawn by me, so feel free to contact me about any additional details. It is still a very unfinished Early Access product. I decided to not title it as full game yet because I still have to make some adjustments and publish it to Steam. I'd like to see people downloading the game and giving me your feedback. Before I start looking for a publisher, I'd like to make sure I have a good video for the game before having to fund a video, a graphic designer and probably a publisher. I would also like to try to have a publisher search in the first place, because it would be nice for publishers to check the product. I would like to become a successful Indie developer, because I enjoy working on my own projects and I love the freedom that Indie games have. [project]: [donation]: about the game, here's a short description of Drifter's Tales: Drifter's Tales is a puzzle game with a story. The beautiful scenery of the first installment of the game is a representation of the entire story. There are four chapters in the game. The player is an unspecified drifter, looking for his kidnapped friends in an unknown city. Your friend is kidnapped and is left to die. And there is a big villain, who appears in the game three times. The drifter and villain meet, fight and the drifter leaves the villain for dead. The story has a nice happy ending, as the dr

Features Key:

- The "***_***" trophies is achieved when all the sprite classes for the game, minus the mission sprites are created.
- The one frame win content is achieved when the game creates a one shot gif that is twice as large as the smallest sprite.

Ball For PC

Action, comedy, stealth – the game offers all that, and some hard difficulty too. You will have fun playing it. You are a hacker, assigned by a gangster to infiltrate an organization full of threats. You will have to collect information about the personalities of their senior managers by reading their e-mails. Remember that you don't have access to the internal networks of the organization, so only rely on the e-mails provided to you by your contact. Your contact will share everything you need to succeed in this job. It is very important that you are able to keep a low profile and it is crucial that you don't attract unwanted attention. In short: you're a hacker, and you will use all the means possible to accomplish your mission, while having fun at the same time. You will have to deal with all the risks and problems that your job may bring to you: your health, your physical security and the added risk that your presence could be discovered in the process. To complete your mission, you will have to improve the work environment within the organization. And you have to make sure your health does not suffer any consequences in the process. Only that way you can carry out your mission in the deadline that the gangster has assigned to you, without risking your personal integrity. Can you do that? PART ONE: The plot starts this week! Welcome to the series of Positron's game scenarios. We will show you how a scenario is created, how it evolves and how it comes to the end. In this particular case, we are following two of our actors Jack and R.D. The scenario is called "Scary Gangster" and it's written by Andrew Frock. It was presented to us as an original concept. We liked it so much that we decided to have an extended version of it and play it ourselves. If you want to know more about how we worked on it, then, follow this link: GAME OVER! This game is an extended version of the one that we showed on some episodes of Scenario Squad. We gave the idea

of this one to our friend and fellow scenarist Andy Frock (another interview here). He created an original scenario in which we could play as a hacker. The structure of the game is very simple c9d1549cdd
