products and parts.

However, if you use the file
as is, you will have to use it
to unlock the hard drive of
the laptop you want to.Q:
Debugging JEditorPane in a
Java Swing application I
have a JEditorPane in a
JPanel. When I run the
application I can't figure out
how to have a console view
(similar to the one in C++).
It just displays the text
"EditorPaneDemo" for the
first time and not anything

else. If I run the source code, all it displays is:

```
public class
  EditorPaneDemo { public
    EditorPaneDemo() { JFrame
      frame = new
        JFrame("EditorPaneDemo"); f
          rame.setDefaultCloseOperati
            on( 6d1f23a050
```
