

USB over Ethernet is a professional software for sharing a USB port over the Internet or a local network. USB Network Gate gives you remote access to USB over the network. You can back up the contents of a USB storage device using USB Network Gate. In addition, remote management of USB devices is possible, as well as data recovery (in some models) in the USB Network Gate. The USB storage and backup management features, as well as remote USB devices, are provided free of charge. For more information about USB Network Gate, go to <http://www.usb-netgear.com/usb-netgear-gig.htm>.
