This release packed by AppNee has built in all the game console BIOSfiles (12) and video/audio plugins (120+) which I dare say is the most complete you can find through the wholeInternet. Just in order to make it much more easier to use for every PSone fans, hoping you guys toenjoy and cherish it. The creator of this game says that it's his best emulator to work with and this release is being fully tested by himself. He has set up fake name and address on BitTorrent and searches the web for the fastest torrent download speeds. Normally the servers will be flooded with many torrents after some time. This torrent will be the only and the fastest one to get it. On the other hand, I have 2 EPsXE 7.0.0 full version with me : the other one by ExodusMAN. There are so many PSone games out there, but there are few good emulators for PSone games. This release is packed with over 120 plugins which is the most at this moment available.
